Professional Summary

Data Engineer with experience building ETL/ELT pipelines and transforming raw data into reliable, structured datasets for analytics and business intelligence. Strong knowledge in SQL, Python, and data modeling, with hands-on experience in Apache Airflow, Databricks, and PySpark. Full stack development background adds technical depth in API integration and data consumption across applications.

Professional Experience

IT Assistant

Shopping Vida Group

May 2025 – Present

- Supported ETL processes for data extraction, transformation, and loading across internal systems.
- Built and maintained analytical datasets and Power BI dashboards for business decision-making.
- Performed data validation and transformation to ensure quality and consistency across systems.
- Automated recurring reports with Excel, improving efficiency in data analysis workflows.
- Provided technical support via help desk, server administration, and network management.

Full Stack Developer

Freelancer

2023 – 2025

- Developed RESTful APIs and backend services using Node.js for data ingestion and system integration.
- Designed and integrated relational and NoSQL databases for scalable web applications.
- Built web applications using React, Next.js, delivering projects end-to-end from requirements to deployment.

Skills

- **Data Engineering:** ETL/ELT, Data Modeling, Data Pipelines, Apache Airflow, Databricks
- **Programming:** Python, Pandas, PySpark, SQL
- **Big Data:** Apache Spark
- **Visualization:** Power BI, Plotly, Streamlit
- **Databases:** PostgreSQL, MySQL, SQL Server, MongoDB
- **Web Development:** React, Next.js, Node.js, JavaScript, TypeScript, HTML, CSS
- **Tools:** Git, Docker, Figma
